PromarkerD Enhanced Report

PromarkerD Test Results

Prognostic **37** indicates a **high risk** of decline in kidney function.*

* As defined by incident diabetic kidney disease (eGFR <60mL/min/1.73m²) in the next four years. Note: If eGFR level at the time of the test is already <60mL/min/1.73m², then the risk of a further decline in kidney function is defined as an eGFR decline ≥30% in the next four years.

Biomarkers

Marker	Result	Units	Reference Range
Apolipoprotein A4	161.0	mcg/mL	3.0 - 100.0
CD5 Antigen-Like	2.5	mcg/mL	0.8 - 7.0
Insulin-Like GFBP 3	6.2	mcg/mL	0.8 - 9.3
HDL Cholesterol	40.1	mg/dL	>39
Creatinine	1.3	mg/dL	0.8 - 1.40
CKD-EPI Creat eGFR	55	mL/min/BSA	>59

Interpretive Information

Interpretive comments based on results appear here:

Recommend close monitoring and intensive glycemic and blood pressure management. Optimize lifestyle factors.
Recommend switching to renoprotective antihyperglycemic medication and retesting in 3 months.
