PromarkerD Enhanced Report

PromarkerD Test Results

Prognostic **0** indicates a **low risk** of decline in kidney function.*

* As defined by incident diabetic kidney disease (eGFR <60mL/min/1.73m²) in the next four years. Note: If eGFR level at the time of the test is already <60mL/min/1.73m², then the risk of a further decline in kidney function is defined as an eGFR decline ≥30% in the next four years.

Biomarkers

Marker	Result	Units	Reference Range
Apolipoprotein A4	9.7	mcg/mL	3.0 - 100
CD5 Antigen-Like	1.6	mcg/mL	0.8 - 7.0
Insulin-Like GFBP 3	1.8	mcg/mL	0.8 - 9.3
HDL Cholesterol	27.1	mg/dL	>39
Creatinine	0.8	mg/dL	0.8 - 1.40
CKD-EPI Creat eGFR	104	mL/min/BSA	>59

Interpretive Information

Interpretive comments based on results appear here:

Standard diabetes management recommended.
